

Titel

Programmblock 1: Hello World

```
1 package snippets;
2
3 public class Main {
4     /**
5      * The main method
6      * @param args CLI arguments
7      */
8     public static void main(String[] args) {
9         String name = "World";
10        // Prints "Hello, World!" to stdout
11        System.out.println("Hello, " + name + "!");
12
13        int _unused = 42;
14        if (_unused == 42) System.out.println("Not unused");
15    }
16 }
```

Programmblock 2: Rust Hello World

```
1 pub fn main() {
2     print!("Hello World!")
3 }
```
